PROFILE

I build whole products on my own: the Go API, the Next.js web and admin apps, the Flutter app, the Telegram bot and the servers they run on. In the last year that meant 10+ platforms in catering, hiring, real estate, logistics and education, most with AI features and Uzbek payments.

EXPERIENCE

Oct 2025 – Present

NDC-CO Software Engineer

- Built ovqatgo.uz alone: catering SaaS with CRM, storefront, Mini App, courier app and receipt printing. ~780 API routes, 136 tables, Postgres row-level security per tenant.
- Built huntly.uz, a Telegram-first hiring marketplace where AI reads résumés from voice, PDF or photos and ranks candidates. ~228k lines of Go, 376 test files, CI with secret scanning.
- Built the internal ERP of a Tashkent university, now used across the institute: ~630 routes, 125 tables, role-based access, timetable builder, sync with the national HEMIS system.
- Built five more platforms: AI real-estate aggregator, parcel forwarding with AI customs codes (client.yumecs.uz), e-commerce, LMS with HLS video (phdschool.uz), job marketplace.

Feb 2026 – Present

VSOFT Software Engineer

- Built talabago.com: four web apps and a Go API (~235 routes) with an IELTS examiner, AI-text detector and Payme/Click billing.
- Built mezonim.uz, a personal-finance app whose Flutter code also ships as a Telegram Mini App, with a bot that runs the free trial.
- Designed and built company and client sites: vsoft.uz, dentrepublic.uz, thebeqasam.uz.

Apr 2025 – Sep 2025

iSphere Frontend Developer

- Built admin panels and storefronts for e-commerce, car and fitness products in React and Next.js.

Sep 2024 – Mar 2025

Freelance Frontend Developer

- Made websites for clients in Uzbekistan and Russia, from layout to deployment.

Apr 2024 – Sep 2024

Jiddiy Dev Web Developer

- Built and maintained client websites, front and back end.

PRODUCTS

UzMaps uzmaps.uz Map platform for Uzbekistan: own tile server, search in four scripts, developer console with API keys and billing, Flutter navigator. Go, MapLibre, Next.js, Flutter

Airlock *in use at NDC-CO* Lets AI agents and staff reach servers over SSH with 8-hour certificates, human approval and full recording. MCP server, desktop and Android apps. Go, Wails, Kotlin

NestGuard *in development* Turns an old Android phone into a locked kiosk for a child, managed from the parent's phone over an end-to-end encrypted link. Kotlin, WebRTC, Go

SKILLS

Languages	Go, TypeScript, Dart, Kotlin, Python, PHP, SQL
Backend	chi, Gin, pgx, sqlc, River, Asynq, OpenAPI; Laravel, Django, FastAPI
Web & mobile	Next.js, React, TanStack Query, Tailwind, Nuxt; Flutter, Kotlin, React Native
Data & infra	Postgres (RLS, PostGIS, pgvector), Redis, MinIO; Docker, nginx, CI/CD
AI & integrations	Claude, OpenAI, Gemini, Ollama, MCP; Payme, Click, Uzum; Telegram Mini Apps
